SIXTH FORM MATERIALS PRIZE

STANDARD JUDGING FORM

On the following page you will find the Standard Judging Form which you should use to help you to assess the work of your students in order to select your five nominees to go on to the National Competition.

The form has not been designed to measure the academic ability of your students. This project is all about encouraging your students to find out more about materials and although this does involve acquiring new knowledge, its primary aim is to get your students to engage with a new subject and develop some of the transferrable skills that will be invaluable to them as they progress through their career.

We don't want you to labour over this marking/selection process; rather we would like you to take a best fit approach. You may get a feel for which candidates are engaging most with the competition as you progress through the modules. We would like you to use your professional judgement in selecting the candidates that you put forward but encourage you to use the judging form in aiding this process.

If you have any questions please do not hesitate to get in touch
(diane.aston@iom3.org).
