

## The 15<sup>th</sup> World Conference on Titanium

**The 15<sup>th</sup> World Conference on Titanium continues the series of meetings that have been held every three or four years since 1968, with a return to the United Kingdom for the first time since 1995 when the conference took place in Birmingham.**

The conference provides a forum for the world's titanium community to present and discuss the latest technological developments in titanium science and technology, from the latest extraction technologies through to new and exciting applications of the Wonder Metal.

OPPORTUNITIES**

**12-16 JUNE 2023**  **EDINBURGH INTERNATIONAL  
CONFERENCE CENTRE, UK**

### International Organising Committee

The Ti-2023 organising committee contains representatives from the seven major titanium producing countries, ensuring that the technical programme covers all current and emerging areas of titanium research, development and applications.

- Martin Jackson, *The Institute of Materials, Minerals and Mining, UK*
- Adam Pilchak, *The Minerals, Metals & Materials Society, USA*
- Vasisht Venkatesh, *ASM International, USA*
- Andrey Alexandrov, *Interstate Association "Titan", CIS*
- Takayuki Narushima, *Japan Institute of Metals and Materials, Japan*
- Hui Chang, *The NonFerrous Metals Society of China, China*
- Carsten Siemens, *Deutsche Gesellschaft für Materialkunde e.V., Germany*
- Patrick Villechaise, *The French Society for Metallurgy and Materials & The French Titanium Association, France*

## The 15<sup>th</sup> World Conference on Titanium

### About Edinburgh/EICC

The conference will be held in the Edinburgh International Conference Centre, known locally as the EICC, which is situated in the heart of the historic city of Edinburgh. It is just a short walk away from Princes Street, Edinburgh Castle and the Royal Mile.

The striking circular design of the Centre has made it one of Edinburgh's most distinctive landmarks. As you would expect from a world-class venue, the technical presentation and communication facilities are modern, efficient and adaptable.

Edinburgh is a UNESCO World Heritage Site with a wide variety of museums, art galleries, theatres, shops and restaurants. It is a compact city and all its attractions are within walking distance or a short bus or taxi journey.

Edinburgh Airport is just 20 minutes from the city centre and has connections to 130 worldwide destinations. Rail links to the city run all over the UK, with more than 20 daily trains running between Edinburgh and London, taking just over four hours.

**Join us at Ti-2023 and find out why there's nowhere in the world quite like Scotland's capital.**

## The 15<sup>th</sup> World Conference on Titanium

With a forecast global attendance of 700 delegates, the Ti-2023 conference programme will cover the following technical areas with contributions from both academia and industry.

- Resource and Energy Efficiency; Recycling; Life-Cycle Analysis
- Extraction, Casting & Powder Production
- Additive Manufacturing & Repair Technology
- Near-Net Shaping and Powder Consolidation
- Thermomechanical Processing
- Forming, Machining and Joining
- Composition - Microstructure - Property Relationships
- Materials 4.0; Multiscale Modelling
- Intermetallics and MMCs
- Environmental Behaviour
- Aerospace Applications
- Biomedical and Healthcare Applications
- Marine, Offshore, Automotive & Other Applications

OPPORTUNITIES**

**12-16 JUNE 2023**

**EDINBURGH INTERNATIONAL  
CONFERENCE CENTRE, UK**

**Promoting your organisation at Ti-2023 will deliver numerous benefits and opportunities including:-**

- **Visible association for your organisation with a global industry event**
- **Direct access to key industry professionals and decision makers**
- **Promote your latest techniques and services to more than 700 titanium metallurgy and applications experts**
- **Enhance your organisation's knowledge of the latest scientific and technical developments**
- **Strengthen your networks and create new partnerships with the highest levels of the research community**
- **Gain a competitive advantage**

**To discuss sponsorship or an exhibition presence at Ti-2023 please contact
