Pressure to perform in student and work life

Have you ever experienced pressure to perform in work/student life? Our Student and Early Career Members Group wrote a blog post on their own experience.

Almost all of us will have felt the pressure to perform at some point in our lives. Some excel

An insight into the COVID-19 crisis from the Student & Early Career Committee

The COVID-19 crisis has affected the entire world, and yet each individual experience is unique. Below are a series of testimonies from the IOM3 Student & Early Career Committee (SECC) detailing their experiences – from PhD students, to furloughed industrial workers, to those who have remained in work throughout. It is an interesting insight into the challenges this crisis has brought to the table.

Martyn Jones CEng MIMMM, Chair SECC, Rolls-Royce – Furloughed

I was in the first wave of staff to be furloughed at the start of April. Having a young family, working from home came with challenges, so actually, being furloughed solicited a mixed response. I was disappointed and frustrated with being put on furlough, but fully understood the need for our business to be able to 'take a breath' so to speak. I felt guilty afterwards when I was enjoying spending quality time with my son, while my wife and so many others were working hard to tackle the pandemic and keep the country running. At the beginning of May, I was told I was to go back to work and, although I had enjoyed the extra time with my son that I'd been unexpectedly granted, I was glad to get back to contributing to essential work that has needed doing. While there is still a great deal of uncertainty around how the world recovers from this pandemic, I personally find it very useful and reassuring that throughout this period I've had the IOM3 community and resources to fall back on when necessary. Having the IOM3 COVID-19 Content Hub has been a particular help, along with knowing that in difficult times, members have access to the Member's Benevolent Trust.

Mentoring Support for Members

Interested members can be paired with:

- Central mentors
- Company-based mentors

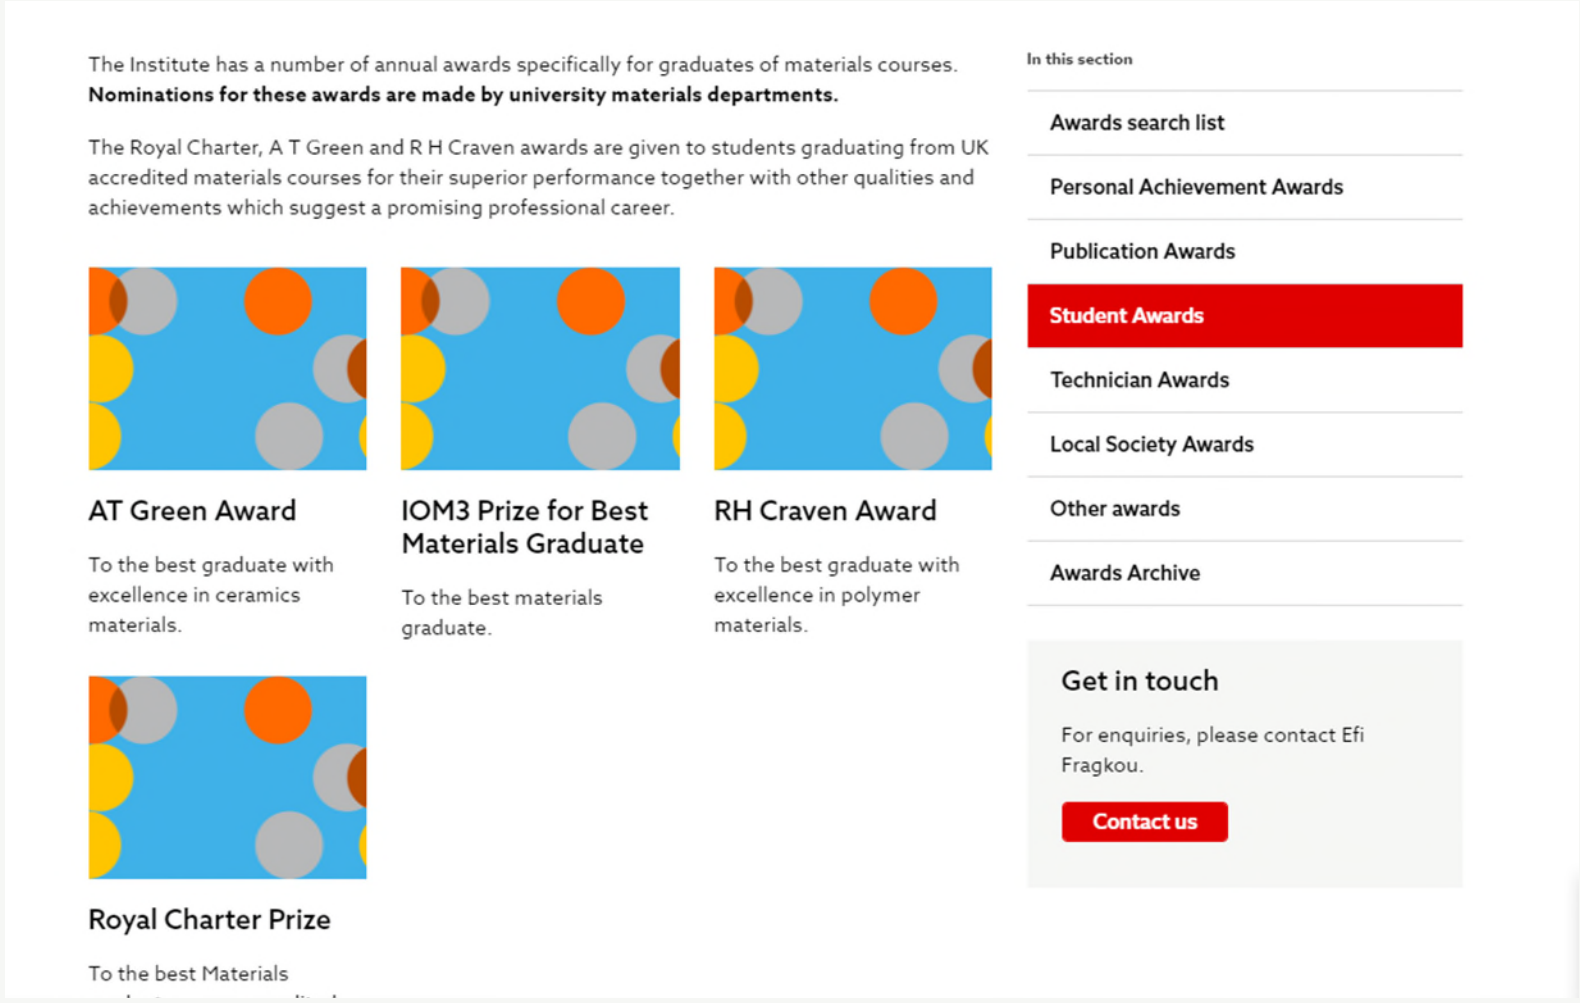
IOM3 Student Awards

bit.ly/IOM3StudentAwards



The Institute has a number of annual awards specifically for graduates of materials courses. **Nominations for these awards are made by university materials departments.**

The Royal Charter, A T Green and R H Craven awards are given to students graduating from UK accredited materials courses for their superior performance together with other qualities and achievements which suggest a promising professional career.

AT Green Award

To the best graduate with excellence in ceramics materials.

IOM3 Prize for Best Materials Graduate

To the best materials graduate.

RH Craven Award

To the best graduate with excellence in polymer materials.

Royal Charter Prize

To the best Materials

IOM3 Technician Awards

bit.ly/IOM3TechnicianAwards

The Institute's Technician Awards are open to all those currently studying materials or minerals technology or related subjects and those who have completed such courses within the last two years. There is no age barrier.

Technician of the Year Award - Cat A

For individuals studying or have qualified within two years of nomination, a course that leads to the awards of a qualification at either Level 2 or Level 3 on the National Qualification Framework or equivalent.

Technician of the Year Award - Cat B

For candidates who are studying, or have qualified within two years of nomination, a course that leads to the award of a qualification at either Level 4 or Level 5 on the National Qualification Framework.
