

New accreditation costs

IOM3 has recently reviewed the fees it charges with respect to its accreditation activities. The current fee structure has remained unchanged since 2013 and in no way reflects the full costs involved with this activity. IOM3 will therefore be introducing a new series of charges that will ensure the continuation of this activity and to bring us into line with other professional engineering institutions undertaking accreditation.

Academic course accreditation

A tiered approach will operate which will depend on the number of courses under consideration for accreditation. The following relates to accreditation fees only.

No. of courses	Accreditation fee
1 to 3	£1,000
4 to 6	£2,000
7 to 9	£2,500
10+	£3,000

Panel costs

Where accreditation visits are carried out in person, travelling and other costs will be recharged to a maximum of £1,750 for visits in the UK. Overseas visits will be charged at cost.

Industry IPD scheme accreditation

There will be a charge of £2,500 per scheme.

Panel costs

If and when accreditation visits return to an onsite/face to face activity, travelling and other costs will be recharged to a maximum of £1,750 for visits in the UK. Overseas visits will be charged at cost.
