

Young Persons' Lecture Competition 2022

03 March 2022 | 16:00 – 18:00 (BST)

FREE EVENT - Click here to register

The line-up of presenters:

- 1. Elastic modulus measurement using impact excitation**
Stan Smith
National Physical Laboratory
- 2. Developing bioelectronic materials for cardiovascular tissue engineering**
Dannielle Cox-Pridmore
National Physical Laboratory
- 3. A novel structural health monitoring technique for aerospace composites**
Jamin Daniel Selvakumar Vincent
National Physical Laboratory
- 4. They are EVERYWHERE: The use and hidden danger of polymers in personal care products**
Paweenuch Teerasumran
University of Surrey
- 5. Fighting climate change with biomass combustion ash**
Mike Gorbounov
Brunel University
- 6. Crystal engineering for enhancement of drug solubility**
Thomas Hibbard
University of Reading
