

# THE JUNE WILSON AWARD

London Materials Society invites entries for the **June Wilson Award**

***The London Materials Society (LMS) is honoured to host the June Wilson Award and an annual lecture in honour of Professor Larry Hench.***

The prize will be awarded at a special annual Larry Hench lecture every November. The Award is meant to highlight the research of the recipient and honour the pioneering contributions made to the field of biomedical materials by June Wilson, one of the first women to investigate the histo-pathology of materials, create the techniques to understand the mechanisms of bonding of bioactive materials to bone, discovered the concepts of soft tissue bonding to bioactive materials and identified the phenomenon of osteoproduction. She also led the pioneering efforts to obtain FDA approval of clinical use of bioactive glasses and mentored numerous students in Florida and London during her 30-year career in the field.

Young women interested in competing for the Award should submit their **name, date of birth and affiliation(s), as well as an abstract of no more than 500 words describing their current and proposed future research to [info.lms.iom3@gmail.com](mailto:info.lms.iom3@gmail.com), no later than 5 pm on 10 October.**
