Agenda

- Introduction to OGTC
- Overview of the challenges
- Inspection & sensor technologies
- Other Factors

The OGTC

We are all about technology innovation...

Inspire

Stimulate

Accelerate

Deliver

... working in partnership with industry.

£180 million of City Region Deal funding

Strong delivery

The story so far...

£18M+

of investment approved to develop and deploy new technology

9

offshore field trials of innovative technology

30

live projects to accelerate the adoption of innovative solutions

60+

members from major operators to SME technology providers

300+

technologies and projects reviewed for offshore trial or investment

100+

ideas generated through our 'Call for Ideas' process

Positive engagement with companies of all sizes

Current themes

Asset Integrity

Eliminating the impact of asset integrity on uptime

Well Construction

Reducing drilling costs by 50%

Small Pools

Developing up to 3.4 billion barrels of oil and gas discoveries

Decommissioning

Driving down the cost of decommissioning

Digital

Transforming performance and unlocking hidden data

Identified by industry through the Technology Leadership Board

The CUI challenge

£28 billion per
annum

60% of pipework
failures due to CUI

60% of pipework
maintenance costs

CUI management - key inputs

Inspection technologies - existing

Guided Wave

Pulsed Eddy
Current

Low Frequency
Electromagnetic
Techniques

Ultrasonics

Acoustic
Emission

Effective partnering is critical to our success

Inspection technologies - emerging

Microwave
Sensing

Acoustic
Resonance

Terahertz
Spectral
Imaging

Ultrasonic
Tomography

Significant challenges require transformative solutions

Sensor technologies

CorrosionRADAR

Sacrificial
Wires

Electromagnetic
Impedance
Spectroscopy

Ultrasonic
Sensors

Condition monitoring is central to asset integrity

Point for discussion

What can the OGTC do to reduce the impact of CUI through the development of technology?
